GQZ bearings wholesale high quality 1300 Series Self Aligning Ball Bearing

The 1300 series bearings contain models such as 1300C3 bearings, 1300K bearings, 1300TNC3 bearings and so on.

The 1300C3 bearing is a spherical ball bearing with a dynamic load of 7350 and a static load of 1620.This bearing has a specification of 10 mm x 35 mm x 11 mm and belongs to the spherical ball series, featuring a C3 clearance and a nylon cage.

Both 1300K bearings and 1300TNC3 bearings are also spherical ball bearings with similar specifications and dynamic and static load values. These bearings are widely used in multifunctional packaging machines, safes, industrial instruments, positioners, shovels, air purification, heel nailers, ventilators, automotive gauges, automotive lamps, and many other types of equipment.

In addition, there are other types of 1300 series bearings, such as 1302/1302K PLB spherical ball bearings, which have their own characteristics in terms of dimensions, load ratings and weights to meet the needs of different application scenarios.
