Thrust Ball Bearing
51200 thrust ball bearing-51217

Designação	**51217**
Dimensões principais (mm)	
d	85
D	125
T	31
Classificações básicas de carga (KN)	
Dinâmico (Cr)	102
Estático (Cor)	280
Velocidade limitada (rpm)	
Graxa	1300
Óleo	1900
Peso	
(kg)	1.21

GQZ bearings wholesale high quality 51200 Thrust Ball Bearing

The 51200 series bearings contain models of SKF 51200 bearings, NSK 51200 bearings, NTN 51200 bearings.

All of these models belong to unidirectional thrust ball bearings and have the same technical specifications. Specifically, the 51200 series bearings have an inner diameter of 10mm, an outer diameter of 26mm, and a width of 11mm.These bearings may be named differently under different brands, but their basic dimensions and uses are the same. For example, SKF 51200 bearings and NSK 51200 bearings are both unidirectional thrust ball bearings with similar properties and uses. In addition, these bearings have similar performance in terms of lubrication, with a grease-lubricated speed of 5,700 r/min and an oil-lubricated speed of 8,800 r/min.

This information indicates that although the specific models of 51200 bearings may vary under different brands, their basic specifications and uses are the same for application scenarios that require unidirectional thrust ball bearings.
