

Spherical Roller Bearing

Single Row Sealed Series-SB-22210-W33-SS

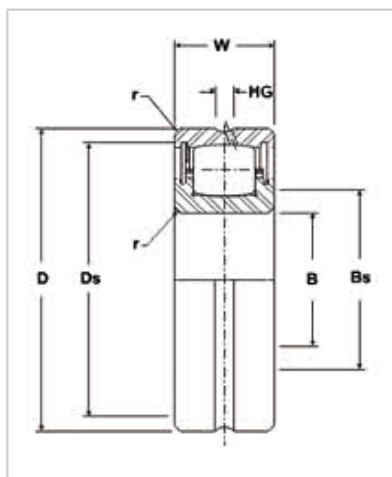

WUXI GUANGQIANG BEARING TRADE CO.,LTD

Bearing Number **SB-22210-W33-SS**

Dimensões principais (mm)

d	50
D	90
B	23
Peso (Kg)	0.68

It is sealed single row spherical roller bearing. Single-row of large rollers result in increased dynamic load capacity and up to 100% greater misalignment of conventional double row spherical roller bearings. Sealing features are combined with the lip-wiping sealing function of an added contact seal, for applications where contamination conditions are particularly severe or where substantial amounts of moisture are present.
