Pillow Block Bearings
UCP Series Pillow Block Bearings-UCP211

Unidade No.	**UCP211**
Nº do rolamento	UC211
Nº da habitação	**P211**
Diâmetro do eixo	
no.	1-1 / 16
milímetros	55
Dimensões de limite (mm)	
h	63.5
uma	219
e	171
b	60
s1	20
s2	25
g	22
C	126
Bi	55.6
n	22.2
Tamanho do parafuso	M16
Massa (Kg)	4.4

GQZ bearings wholesale customize UCP Series Pillow Block Bearings

The characteristics of UCP series external spherical bearings mainly include its design allows the bearings and housings to withstand 3 degrees of misalignment to cope with non-alignment caused by shaft deflection. This design perfectly solves the disadvantages of deep groove ball bearings, which are difficult to fix and have low torque.The UCP series of housed external spherical bearings are the most representative form of bearing assemblies, in which the housing P has a flat bottom solid design, and two series are provided: UCP200 and UCP300.The UCP300 series withstands higher loads compared to the UCP200 series because the root of the housings' mounting area is equipped with a reinforcing bars, a high-strength construction for loads in all directions. In addition, Housing P can be used with UK, UEL, and NA series bearing assemblies for major applications such as transmissions, exercise machines, and harvesters.
